How Do We Do a Sales Return?

A step-by-step story about how our shop takes items back, checks the math, and keeps everything fair.

Sometimes Things Come Back!

Customers return items when something didn't work out.

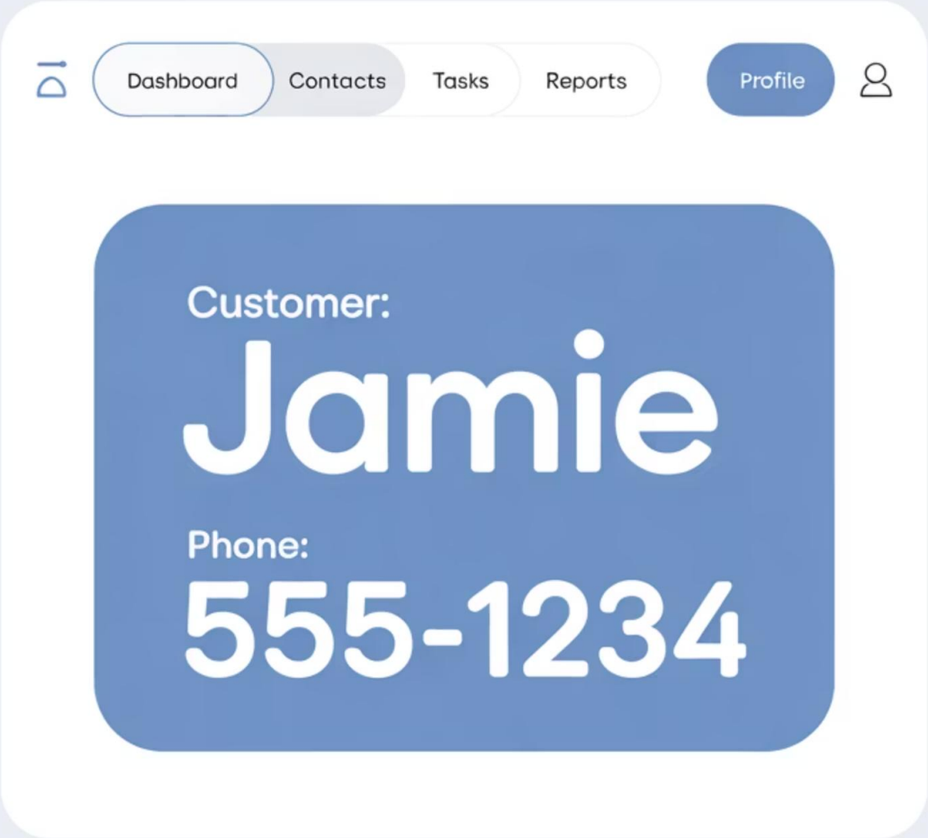
Every return must match a **real sale** in our system.

The **manager** does the return so it's always done right.

Who's Bringing Something Back?

Step 1: Find the Customer

- Search for the **customer** by name or phone.
- Make sure the right person is selected.
- Only items sold to that customer can be returned.



Match It to the Right Receipt!

Step 2: Pick the Original Sale

01

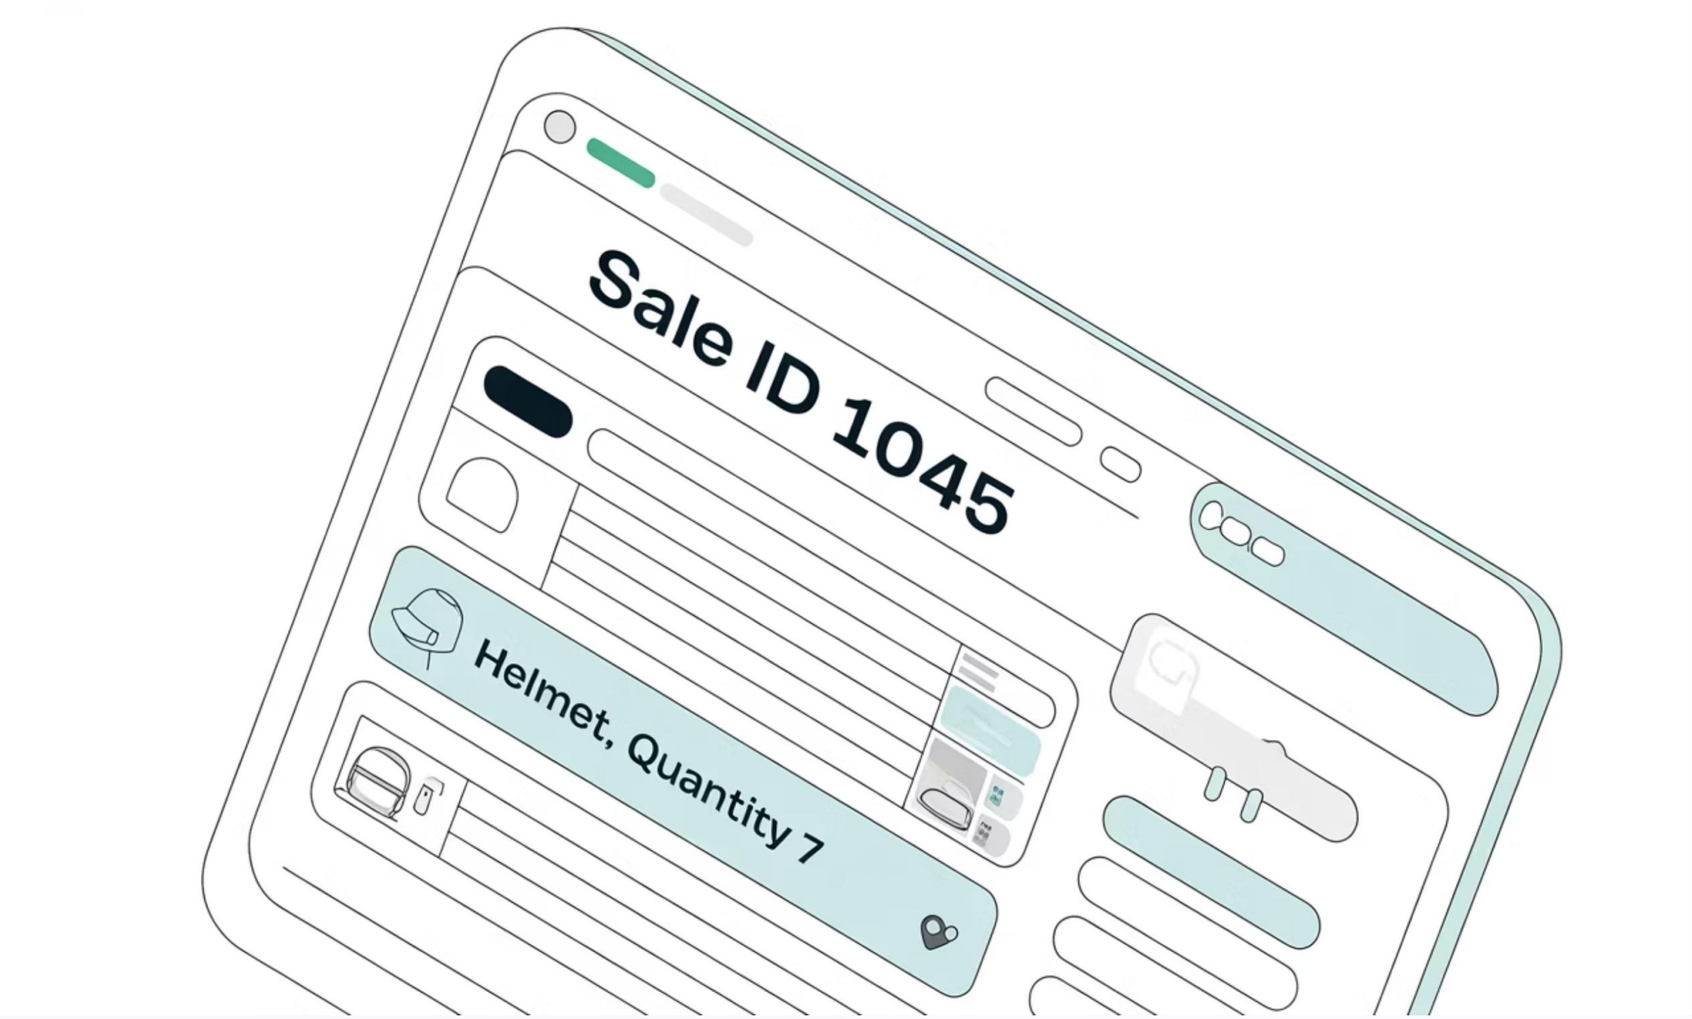
Choose the **Sale ID** that matches the returned items.

02

Only products from that sale appear on screen.

03

This keeps totals and taxes accurate.



Return Only What's Left to Return!

Step 3: Select the Items to Return

- Choose the product and how many are being returned.
- You **can't return more** than what's still available from that sale.
- Example: Sold 7, already returned 3, so **max = 4 left**.
- The system checks this rule automatically.

Make Sure It Adds Up!

Step 4: Check the Refund Math

- The screen shows the **refund subtotal** and **GST**.
- Refund = items × price (minus any discounts).
- Taxes adjust automatically for the amount being returned.

Give Back the Same Deal!

Step 5: Apply the Original Discount

If the sale had a **coupon or discount**, we give the **same discount** back.

The customer is refunded the **same savings** they got before.

It doesn't matter if the coupon is **expired now**–we still match it!

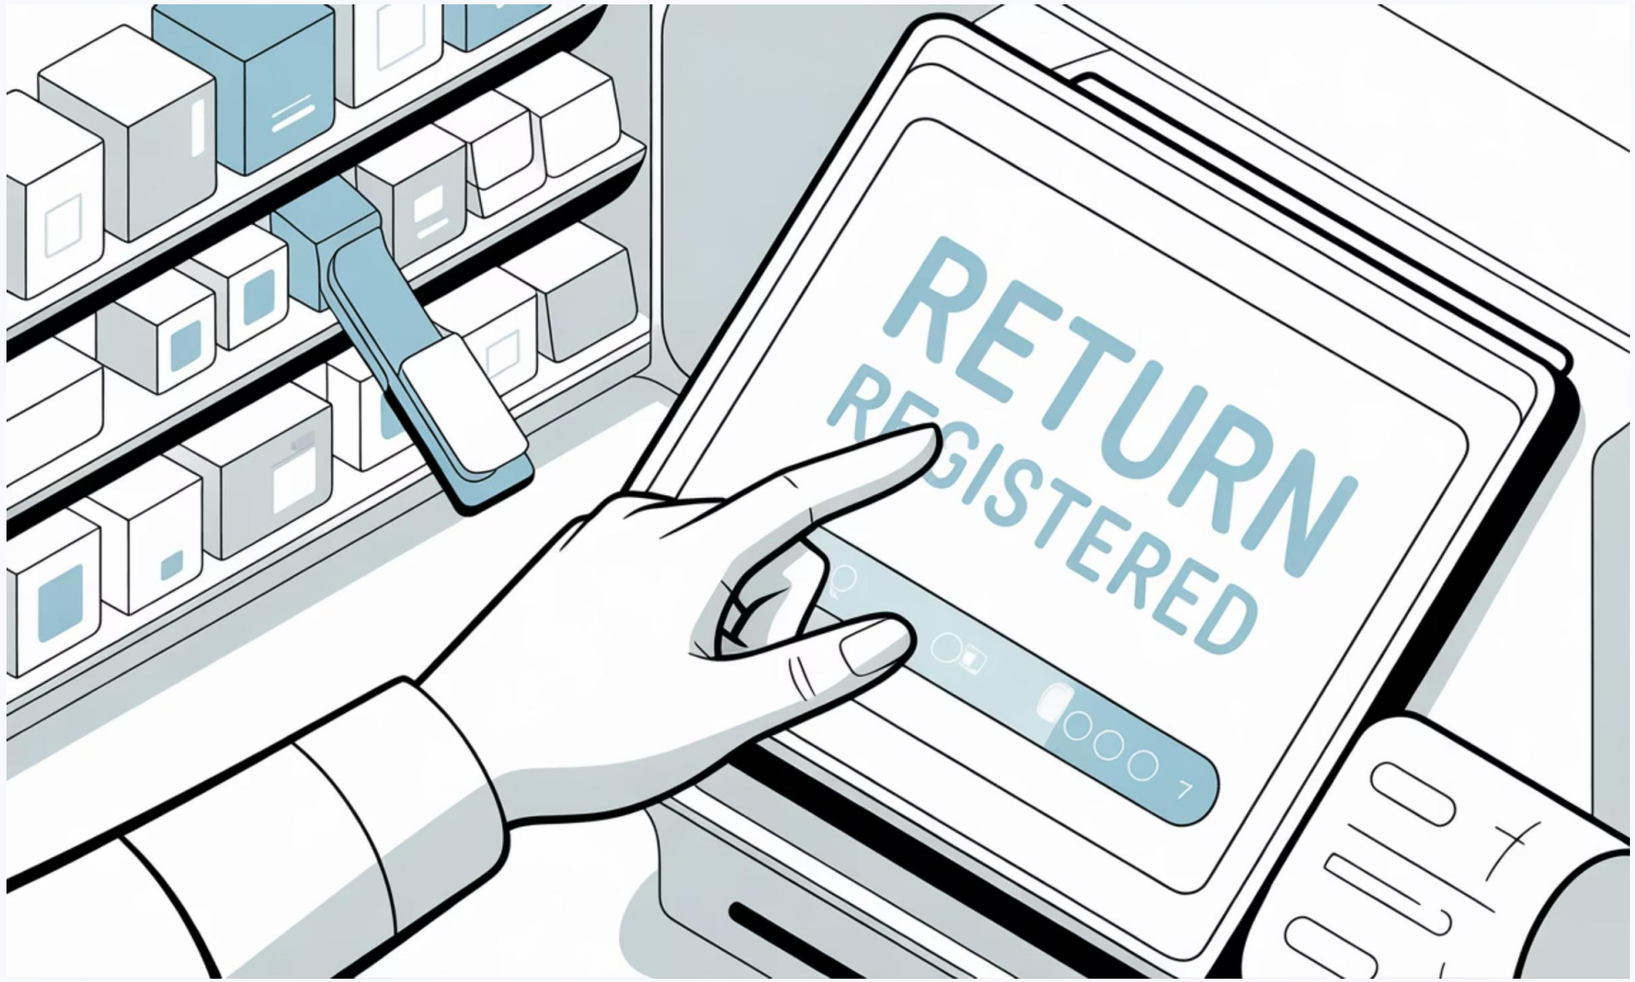
Finish the Return!

Step 6: Register the Return

Click **Register Return** to save.

Stock (**QOH**) goes **up** for every good item returned.

The return record is saved and can't be changed.



Managers Keep Things Honest!

Step 7: Manager Approval

- Only the **manager** can process a return.
- Each return shows **who did it** and **when**.
- This keeps every refund clear and traceable.

Honest Returns Build Trust!

Why It Matters

Stops people from returning **more than they bought.**

Keeps stock (**QOH**) and taxes right.

Makes sure every customer is treated **fairly**.

Returns in 6 Easy Steps!

Quick Recap

01

Find the customer

02

Pick the sale

03

Choose items to return (can't exceed what's left)

04

Check refund totals

05

Match the original discount (even if expired)

06

Register the return (QOH ↑, record locked)

Your Turn!

Let's Talk!

Prompt:

The original sale was for 7 tires. Two tires were returned last month, and now the customer brings 6 back. What's the **maximum** you can return today?

(Hint: 7 - 2 = ❓)
