
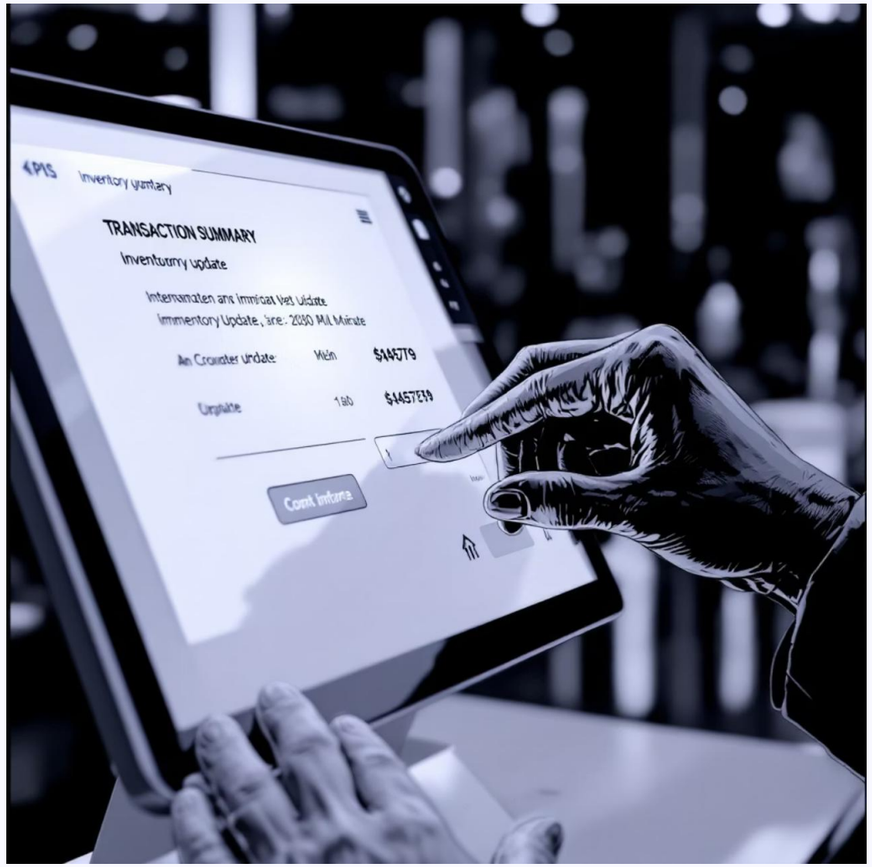
# How Do We Make a Sale?

A step-by-step guide to helping customers, checking inventory, and completing sales the right way.

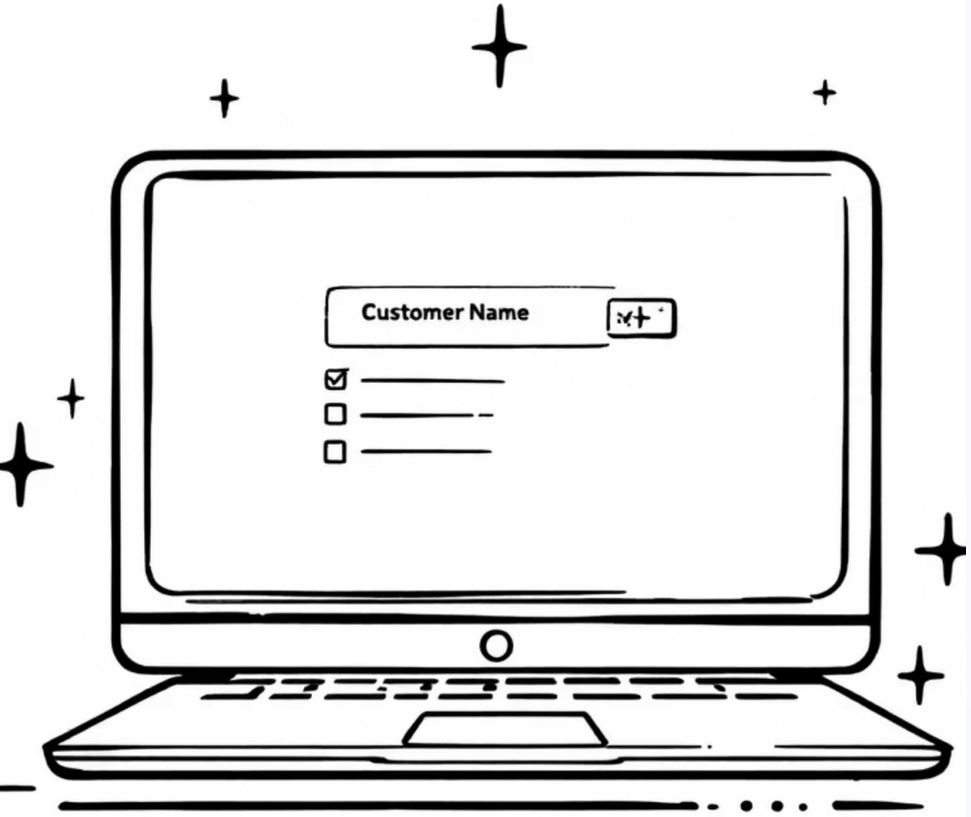
Made with GAMMA

# Sales Are the Final Step in the Journey!

- Selling moves products from our shelves to the customer.
- Every sale updates our **inventory** and **records.**
- A good sale is accurate, honest, and verified.



Made with GAMMA



# Step 1: Find the Customer

## Every Sale Starts with a Customer!

### Search by phone number or name

Locate the customer in your system using their contact information.

### Confirm the right customer

Verify customer details before adding parts to prevent errors.

### System clears cart on switch

If you switch customers mid-sale, the system **clears your cart** to prevent mix-ups.

# Step 2: Select the Products

## Picking the Right Parts to Sell

01

### Choose a category

Select the appropriate category like Tools or Accessories.

02

### Pick the part

Then pick the **part** from the selected category.

03

### Enter the quantity

Specify how many units the customer wants to purchase.

04

### Check availability

You can only sell what's available in QOH.

Made with GAMMA

# Never Sell More Than You Have!

## Important Rule: Watch the QOH!

### System checks QOH

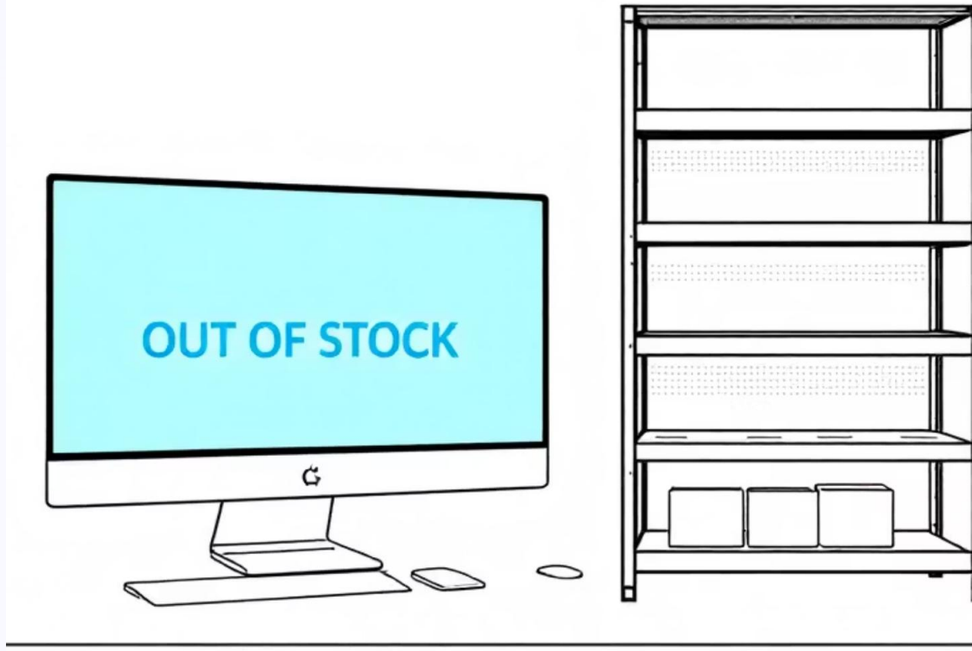
The system checks your **QOH (Quantity on Hand)** automatically.

### Prevents overselling

If you try to sell more than is in stock, it **won't allow it.**

### Double-check stock

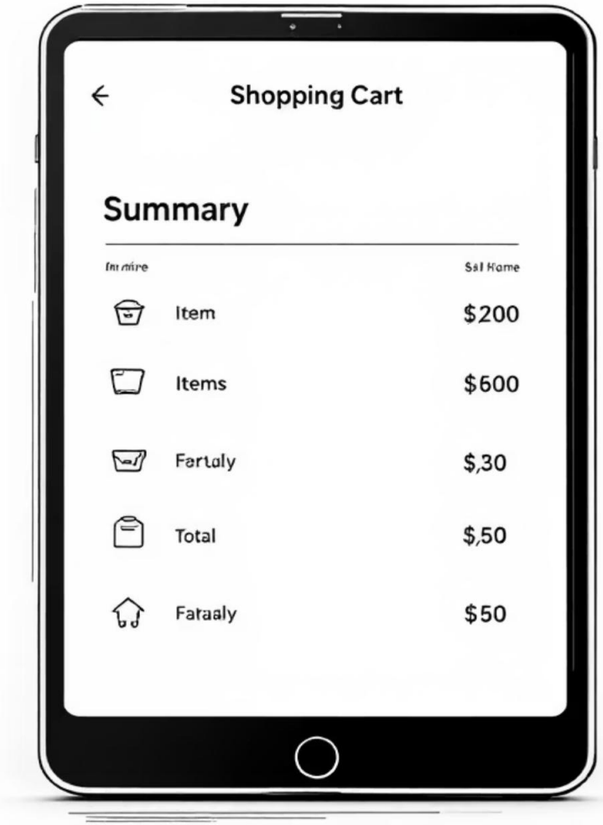
Always double-check stock before confirming the sale.



# Step 3: Review the Cart

## Check Before You Charge

- Review items, prices, and quantities.
- Adjust or remove parts if needed.
- The cart totals update automatically for taxes and discounts.



# Step 4: Apply a Discount (If Any)

## Everyone Loves a Deal!

### Enter coupon code

Input the **coupon code** or select the **promotion** from the list.

### System validates dates

The system checks if the discount is **active** (start & end dates).

### Expired coupons rejected

Expired coupons don't apply.

# Validating Discounts

## Check the Dates Before You Save!

1

### Valid date range only

Discounts only work **within their valid date range.**

2

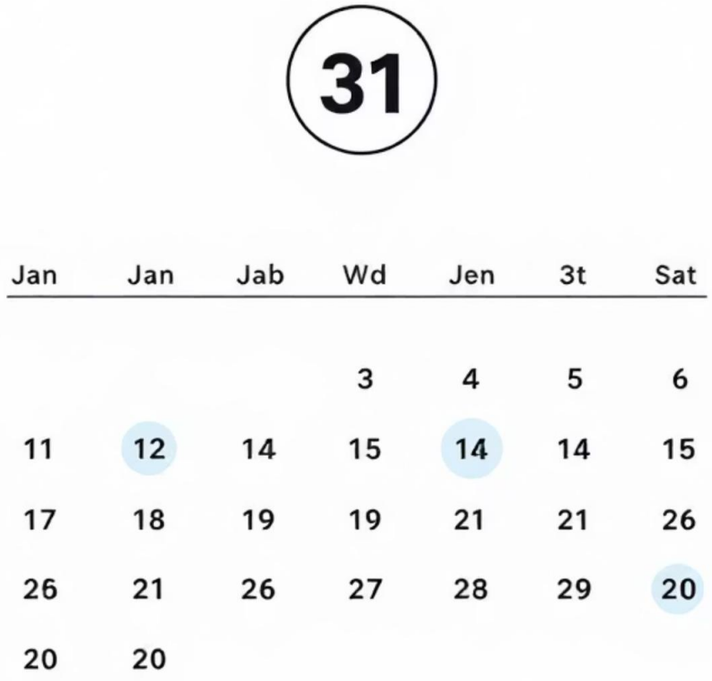
### Verify today's date

Always verify today's date is between the **start** and **end** dates.

3

### Outside range = no discount

If the date is outside that range, no discount is given.



# Step 5: Choose a Payment Type

## How Will the Customer Pay?

### Cash

Accept physical currency for the transaction.

### Debit

Process payment directly from customer's bank account.

### Credit

Accept credit card payment for the purchase.

Payment type is **required** before completing the sale. Once paid, the sale is locked and recorded.

# Finish Strong!

## Step 6: Complete the Sale

### Click "Place Order"

Click **"Place Order"** to complete the transaction.

### System saves sale

The system saves the sale and updates inventory automatically.

### QOH decreases

**QOH decreases** by the quantity sold for each item.

# 🟩 Slide 11 – Step 7: Print or View Receipt

Proof of the Purchase

Made with GAMMA

# Proof of the Purchase

- A Sale ID is created automatically.
- Print or email the receipt to the customer.
- The receipt shows items, taxes, discounts, and totals.
