How Do We Record a Service?

A step-by-step story of how our shop fixes bikes, adds parts, and makes sure everything is right before saving!

The Big Idea

Fixing Things the Smart Way!

Service Record

When a bike needs care, we make a **service record**.

What's Inside

It shows what we fixed, which parts we used, and any deals.

The Truth

Once saved, the record tells our shop what really happened.

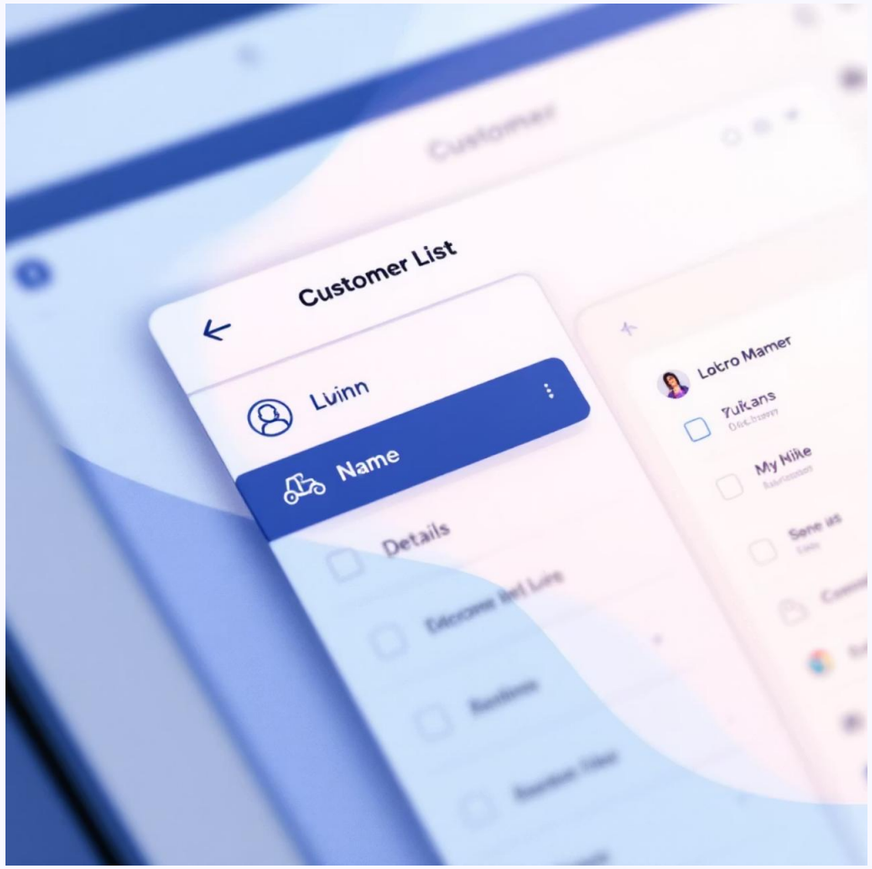
Made with GAMMA

Step 1

Who Are We Helping Today?

Find the Customer & Vehicle

- Look up the **customer's name** in the list.
- Pick their **bike or scooter** from the screen.
- Every repair belongs to **one customer and one ride!**



Made with GAMMA

Step 2

What Are We Doing?

1

Regular Service

Choose a **regular service** like "Tune-Up" or "Brake Check."

2

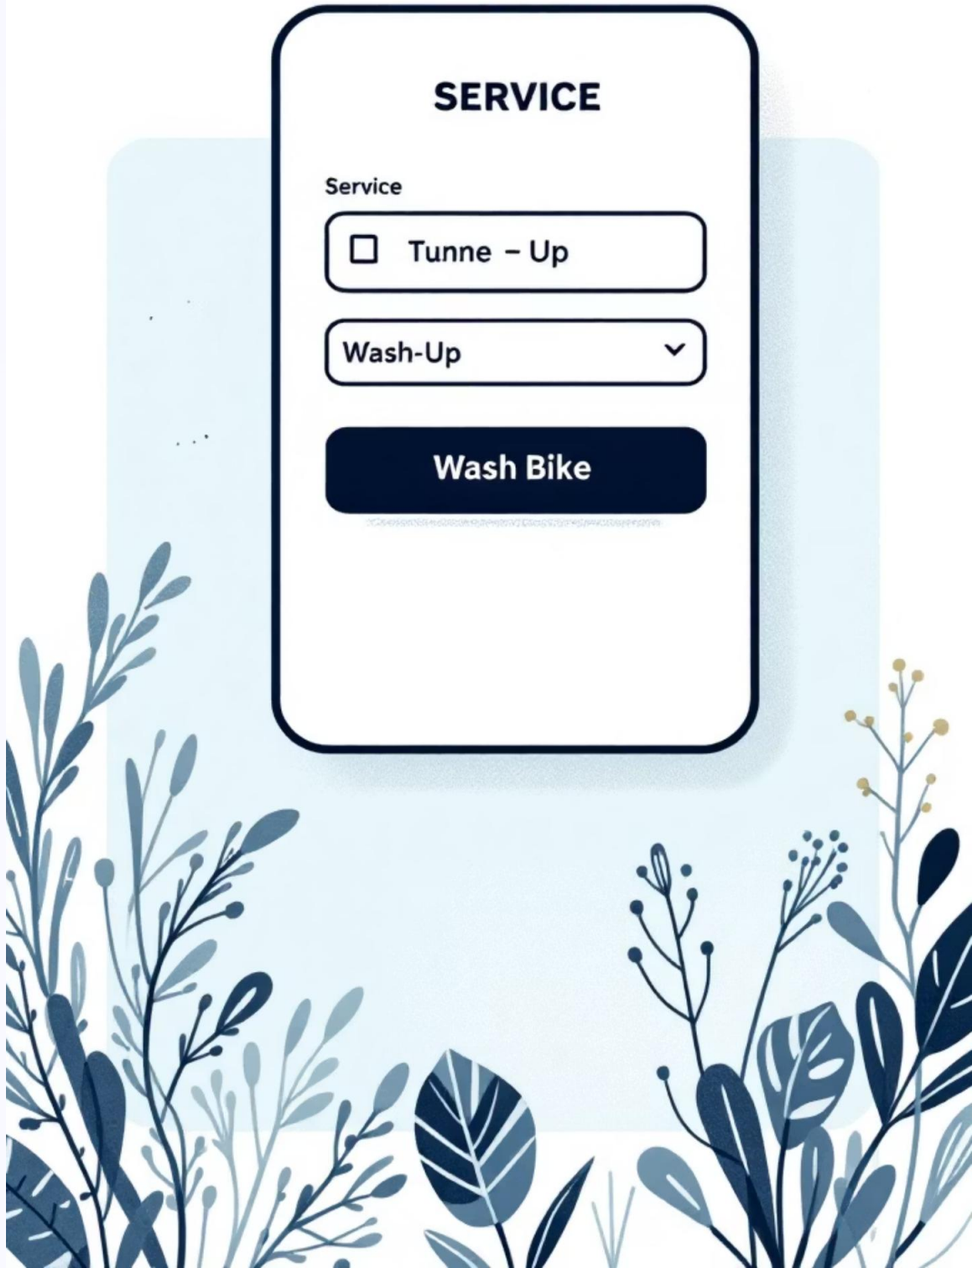
Custom Service

Or type a **custom one**, like *"Wash bike for best customer."*

3

Built-In Rate

The shop rate is built-in – no calculator needed!

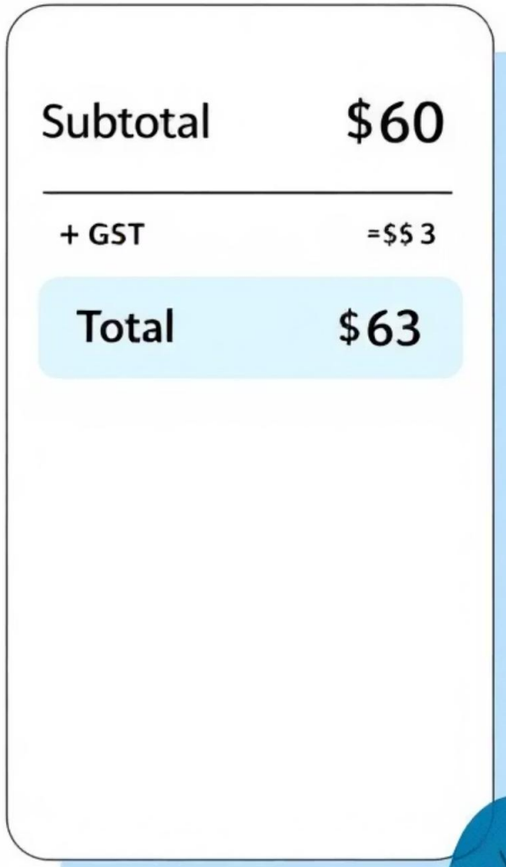


Step 3

Grab What You Need - But Not Too Many!

Add Parts

- Pick the **category** and part name.
- Type how many you're using.
- You **can't use more** than what's **on the shelf (QOH)**!



Step 4

What's the Cost?

Subtotal

The system adds **service + parts** for the **subtotal.**

GST

It figures out **GST (5%)** all by itself.

Total

Now we know the **total price** before any discount.

Made with GAMMA

Step 5

Everyone Loves a Deal!

Apply a Coupon (If Any)

01

Type the **coupon code** and press **Verify.**

02

The computer checks if it's **real and active.**

03

Expired coupons don't count!

Validating Coupons

Check the Dates Before You Save!

Date Range

Coupons only work **between their start and end dates.**

Today's Date

Always make sure **today's date** fits that range.

Outside = No Discount

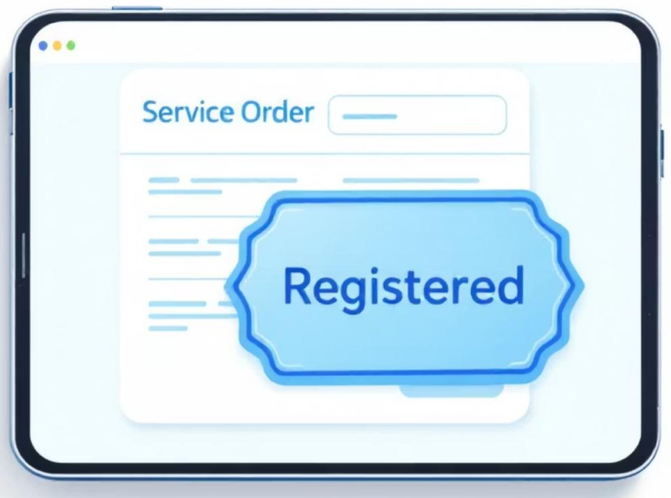
If it's **outside the dates**, no discount shows.

Step 6

Lock It In!

Save the Service Order

- Click **Register Service Order** to save everything.
- The system stores the job, parts, and discount together.
- You can't change it after saving - so double-check first!



Step 7

Made a Mistake? No Problem!

Clear or Start Over

Reset

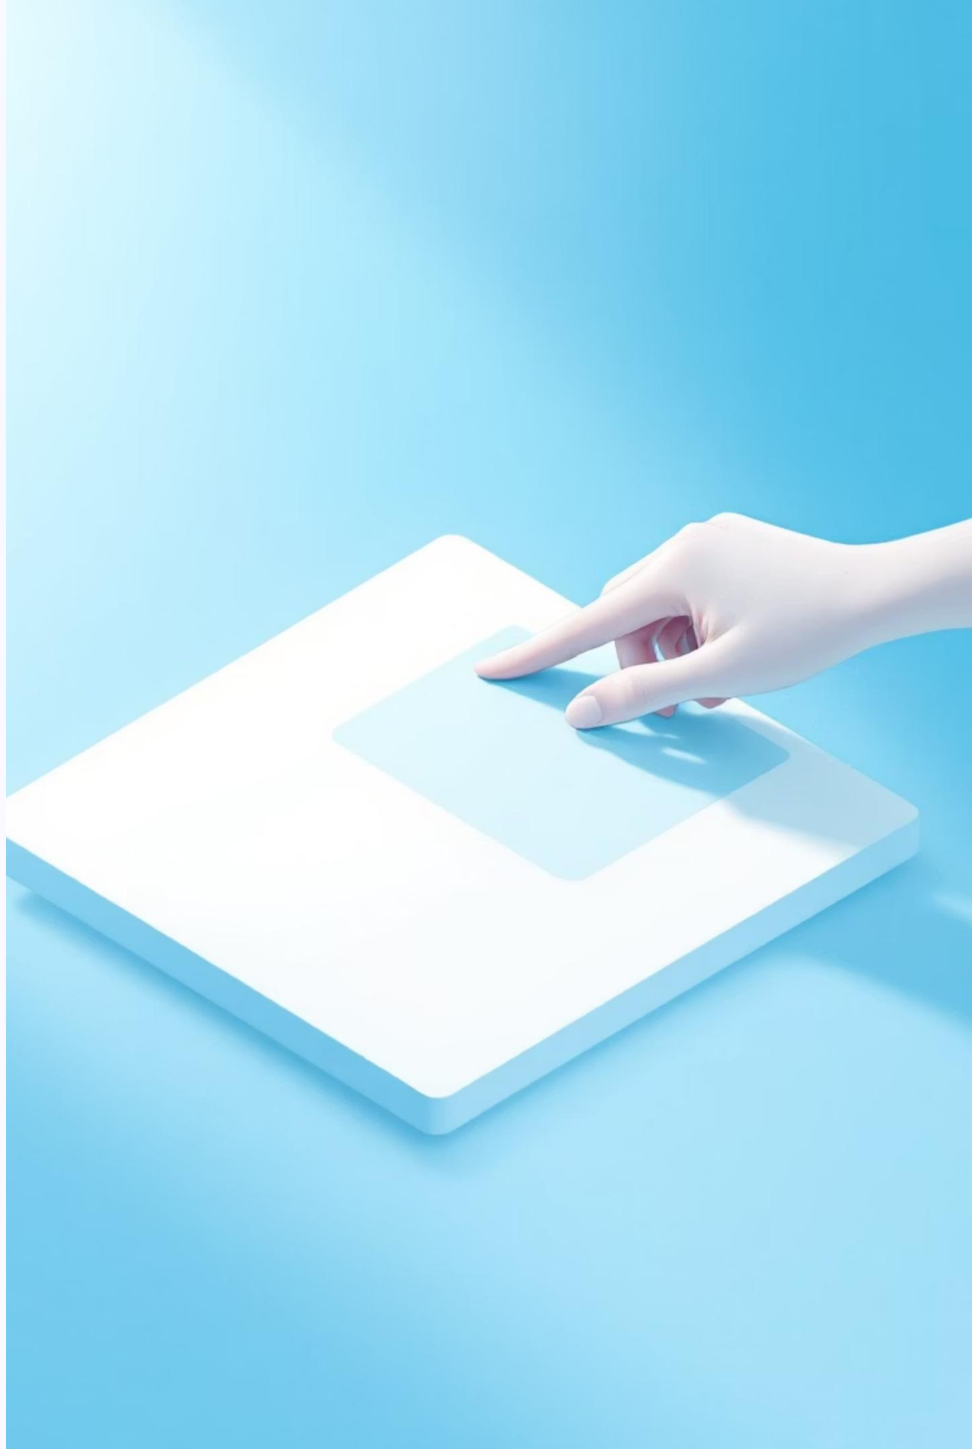
Reset clears just this service form.

Clear

Clear wipes the whole page to start a new customer.

Switch Customers

Switching customers clears it too - always save first!



Good Records = Great Repairs!

Stops us from using **too many parts**.

Makes sure **discounts are fair and current.**

Keeps every repair neat and truthful.

Made with GAMMA

Servicing in 7 Easy Steps!

01

Find the customer & vehicle

02

Add the service

03

Add parts (never exceed QOH)

04

Check totals

05

Verify coupon dates

06

Register the order

07

Reset if needed

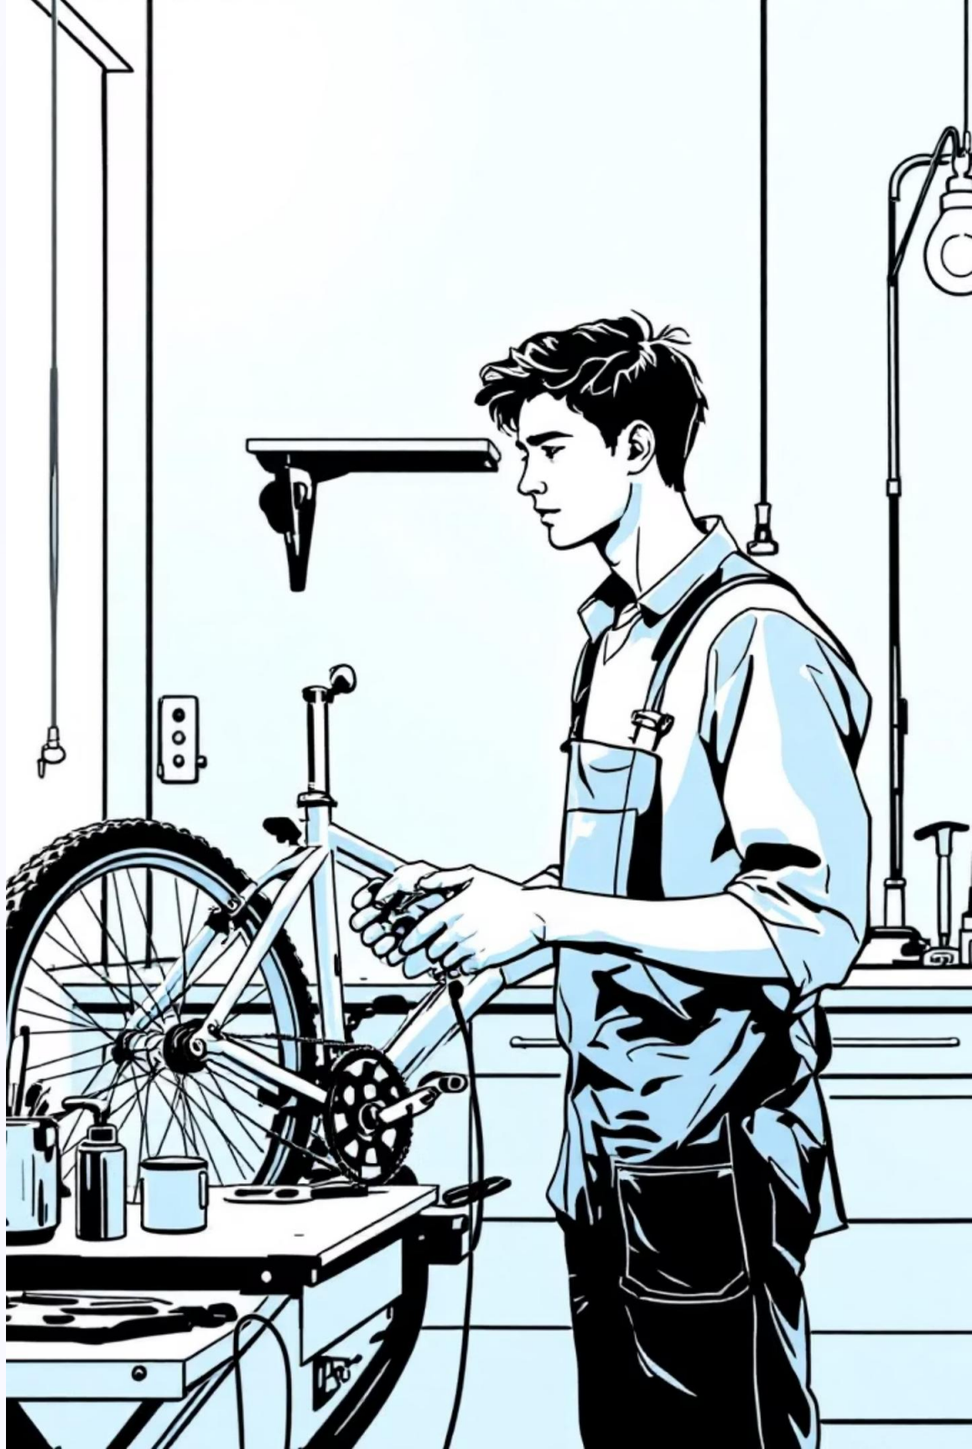
Your Turn!

You're fixing a bike and need 5 chains but only 3 are on the shelf. The customer gives you a coupon that expired last week. What do you do?

Use 3 chains only


Coupon expired!
